

AUTO "WET LOOK" POLISH

Total Protection Formula formulated for all types of painted surface

A unique formulation designed to give a gloss so deep the finish actually appears wet. It removes oxidized paint, road film, tree sap, bugs and tar. It is designed for ease of application and removal, yet is durable to multiple detergent washings. It protects against acid rain, oxidation, and corrosion. Once a protective film of polish is applied, tar and road film can be removed with our Car Wash & Shine Concentrate.

DIRECTIONS:

1. Shake well before using.
2. Apply with soft cotton cloth. Entire vehicle may be polished before removing.
3. Allow polish to haze.
4. Wipe off haze with a clean soft cotton cloth.
5. Polish may be applied in sun or shade.
