Dear Sir;

Your MATRIX seems to be all the folks at RAM bragged it to be. In our C-150 we got an immediate 100 RPM increase in cruise RPM. In our C-340 I noticed it started easily without pre-heating at 12°F, when I used to have to pre-heat anytime below 20°F.

I am sure I am getting the +5% HP at take off on our new TSIO 520 NBR engines (341 HP).

Send me some literature to pass on to those I talk to who are interested.

Sincerely,

Corporate Pilot
