Jonco product used Engine Treatment _____ Locale Houston, Texas

Dear Sirs:

I have an incredible story to relate to you and must tell you how impressed I am with your product.

Approximately three weeks ago my customer mentioned that she was smelling a "rubber" odor and would be bringing the vehicle in.

Today on examination of the vehicle we found a radiator hose off and laying upon the manifold, hence the odor. The amazing thing was that this vehicle had absolutely no water in it for an extended period of time and had been used for all the regular errands of shopping, picking children up from school, etc. There was no damage to the engine at all.

The vehicle is a GMC 25 series VanDura (1978) with 53383 miles on it. On October 26, 1982 it was tuned up and had a Matrix treatment along with your fortified oil done. That is a total of 7633 miles and 6 months. If you average that about 1250 miles or so was driven under normal conditions without any water. Any normal engine would have burned up!

We have retreated it with Matrix and have put in a new oil filter and your fortified oil today, plus replacing the radiator hose and coolant.

I can highly recommend your product to anyone at any time, anywhere, any place, and you can be sure that your product is in my vehicles. Seeing your product at work certainly makes me a believer.

Sincerely,

Shop Foreman

P.S. My customer related that the engine didn't run hot. The thermostat had nothing to read!
