July 13, 1982

Mr. Joe Fritze
Slick 50 Distributor
P.O. Box 60613
Fairbanks, Alaska 99706

I had Joe Fritze install slick 50 in the engines and gear boxes of six of our light vehicles for a test. I had noticed no changes until we had an oil filter gasket blow out on a cold engine start on a blazer. All the oil pumped out on the ground with no one around for approximately 25 to 30 minutes before the engine knocking and noise was discovered.

The engine was shut down and the next morning we pulled the oil pan, oil filter, rod and main bearings. We found no wear or scratches on the bearings and no metal particles in the oil pan or filter. We then reinstalled the same bearings and the engine is still running great.

We have, since this time, installed Slick 50 in all of our heavy equipment, and all our trucks, blazers and pickups, including 33 new 1982 pickups. Slick 50 has done a great job for us.

Sincerely,
H.C. PRICE PIPELINE
