

B. & D. ENTERPRISES
KETCHIKAN, ALASKA

VESSEL—BYERLE E.
ENGINE—V-12 CUMMINS WITHOUT TURBO
SINGLE SCREW FISH PACKER.
OWNER AND OPERATOR - EUGENE MCKAY
KETCHIKAN AK.

On or about the 16th of June the engine received 3 gal. of Slick 50. The boat was pulling at the float at 1100 turns. Within 15 minutes the turns on this engine went up 90 R.P.M. giving 16 turns on the propeller. This was at approx. 1/2 power, since the vessel is not operating steady we have no fuel saving data except the fact that if the fuel rack was dropped back to 1100 turns it would show a fuel savings.

Mr. McKay did note the engine was running much smoother and was starting easier. The oil had been changed before we got there so no oil samples were saved. They will take some on the next change.

Signed,

Capt. Dan Starkweather
Licensed Southeastern Alaska Pilot Assoc.
