To Whom It May Concern

I have been using Bishop products for several years and it has saved me lots of money in many ways.

First off by using Bishops Diesel Fuel Treatment, I was able to up my fuel mileage by 17 gals of fuel per 730 miles a trip pulling double trailers.

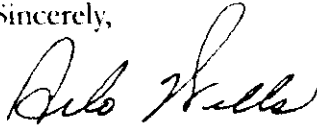

Secondly, Bishops Heavy Duty Engine Protection has saved me more than \$28,000 in engine repairs due to a computer sensor and timing motor that could have washed my engine down and caused a complete in frame overhaul.

The second time it saved my engine was when I lost oil pressure on a trip and it did nothing to the engine and saved another in frame overhaul.

I have used Bishops Heavy-duty transmission and differential treatment in all my gearboxes and I gained a gear on every hill with the same loads as before.

I have used a lot of other Bishops products and have had very good results from every thing I have used.

Sincerely,

A handwritten signature in cursive script, appearing to read "Arlo Wells".
