To Whom It May Concern:

Please thank James for telling me and getting me started on the Bishop products.

The Engine Oil Protection, I am real pleased with. It made my engine run a lot smoother and perform better. As far as better fuel mileage goes, it is to hard to tell on my run. I run form Joslin, Illinois to Seattle, Washington. There is a lot of wind coming across South Dakota and Montana. One time it is blowing hard and maybe the next time it isn't. So it is hard to tell.

But I do know that it performs better.

I have been using it for two years and I would recommend it to any truck owner-operator or fleet owner.

I use Bishops Transmission and Rear End Additive. It cut my temperature heat almost in half of what it normally was before I added it.

Sincerely,

Raymond C. Quilling
